

InCoBAN

INCLUSION, COLLABORATION & TRANSFORMATION

ABOUT

InCoBAN is an ecosystem which aims to accelerate the growth of the global construction & infrastructure industry. InCoBAN is built by practitioners with deep experience & expertise across geographies in the construction & infrastructure industry. Using our years of learning as experienced practitioners, we strive to create global standards in construction & development.

InCoBAN is not yet another business enterprise but an economic model that focuses on synergizing all stakeholders and building national assets in each geography – human capital & physical infrastructure.

Our experience teaches us that “complex system problems, demand complex solutions”. This is our IKIGAI, and the foundation of every initiative at InCoBAN. Our experience enables us to dive deep and create real solutions for real world challenges, creating global benchmarks

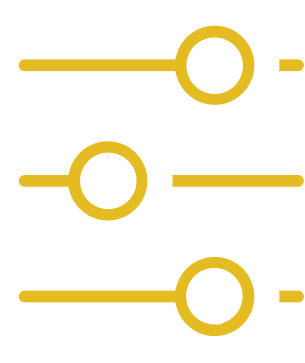

OUR APPROACH

InCoBAN follows a unique 3 step approach – bringing together people, processes & technology

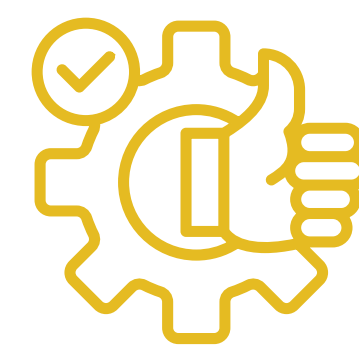

Diagnose

We begin by conducting a comprehensive assessment of an organization's current practices, identifying strengths, opportunities and areas for improvement.

Customized Capacity Building

Based on the assessment, we design tailored capacity building programs and process improvement initiatives to address specific needs and build the necessary skills within the organization.

Institutionalization of Best Practices

We work with organizations to embed effective project management & organisation building practices to create a culture of continuous improvement
